

Are Universities in Indiana Better than Other U.S. Universities?

4-Year Graduation Rates of Schools In Indiana vs Out of Indiana

Universities in Indiana have a higher average 4-year graduation rate.

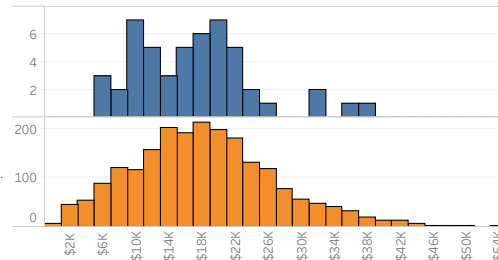

They also have slightly lower average test scores, but the distribution of test scores isn't as wide. There are no schools with extremely low test scores, and there are fewer schools with extremely high test scores.

Average Tuition Prices for universities in Indiana are slightly cheaper.

Students who go to university both in and out of Indiana, who have higher test scores, tend to have a higher 4-year graduation rate.

However, in Indiana, it is more impactful. Having high test scores, past around 900, increases a student's average 4-year graduation rate even more than if a student were going to a university outside of Indiana...

Average Tuition Price of Schools In Indiana vs Out of Indiana

Average Price of Tuition for Schools:

In Indiana \$18.31K

Out of Indiana \$19.30K
